## HOW TO CALCULATE SHIPPING CHARGES

Determine your Fedex Ground shipping zone by taking the first 3 digits of your zip code and refer to the 2nd chart below. For example, if your zip code were 42054, you would find 420 in the chart and see that your zone would be "6".

To determine freight charges, refer to the first chart below. Move down the column to the dollar amount of your order and then across to your shipping zone. at this intersection is your shipping charge. Enter this amount on the other side.

Please note that freight rates may vary due to the number and size of cartons or the actual weight. We will call you if the freight charges are substantially higher or lower than you have calculated.
